

JOSHUA EQUERE

JAVASCRIPT DEVELOPER

ABOUT ME

Developing beautiful applications which have reached thousands of users globally, including Online Marketplaces, Fintech apps, Social Media platforms, Medical Applications (specifically a COVID-19), Trading Platforms, and many more.

Both minimalistic and extremely complex UI problems and implementations are some of the challenges I have taken on. While working on accomplishing my goals for the UI of an application, I very much write my code in such a way that each components are reusable, pure, well tested, and extremely neat.

Please find below technologies I use, applications developed, and certifications obtained so far in my career for your perusal.

Welcome to my Curriculum Vitae
